

START HERE

hi! this is a print-it-yourself zine. you print it, fold it, and it's done. one sheet of paper, about ten minutes, no special supplies.

WHAT YOU'VE GOT

a black and white zine that prints on one sheet of paper and folds into a little booklet. it's black and white so you can print it on colored paper.

PRINTING IT

print on one sheet of **US letter** paper. set your printer to **"actual size" or 100%**, not "fit to page," or the fold marks won't line up. colored paper is the fun part: goldenrod, hot pink, pale blue, that speckled stuff you've been saving. every copy comes out a little different depending on your paper, ink, and scissors. print as many as you want.

A QUICK PRINTER NOTE

most home printers leave a thin white margin around the edge. if yours does, the zine prints a little smaller with a white border, and that's fine. if you want it edge to edge, trim off the white border before you fold. the fold marks stay in the same spots.

FOLDING IT

it's the standard one-sheet, eight-page fold: a few folds, one cut down the middle, and a push to pop it into a booklet. it's easier to watch than to read, so here's a video of me folding one start to finish:

how to fold your zine:

NEED A HAND?

if something prints wrong or the fold isn't working, message me on etsy or instagram, or through kahristinmakesstuff.art, and i'll help you sort it out.

THE FINE PRINT

this file is for personal use. print as many copies as you want for yourself and to give as gifts, but please don't sell them or share the PDF itself. if you bought it as a digital download, all sales are final. if there's a problem with the file, message me and i'll fix it.
